## Non Magnetic SMQ MELF PIN Diode

#### Features

- Non-Magnetic Package Suitable for MRI Applications
- Rectangular MELF SMQ Ceramic Package
- Hermetically Sealed
- Low Rs for Low Series Loss
- Long  $\tau_L$  for Lower Intermodulation Distortion
- Low C<sub>i</sub> for High Series Isolation
- High Average Incident Power Handling
- RoHS Compliant

#### Description

The MA4P7461F-1072T is a surface mountable PIN diode in a non-magnetic, Metal Electrode Leadless Faced (MELF) package. The device incorporates M/A-COM Technology Solutions time proven HIPAX technology to produce a low inductance ceramic package with no ribbons or whisker wires. Incorporated in the package is a hard glass passivated, CERMACHIP™ PIN chip that is full face bonded on both the cathode and anode to maximize surface area for the lowest electrical and thermal resistance. The package utilizes a nonmagnetic plating process that provides for a package with extremely low permeability. The MA4P7461F-1072T has been comprehensively characterized both electrically and mechanically to ensure repeatable and predictable performance. The non-magnetic MA4P7461F-1072T is the electrical equivalent of its magnetic counterpart the MA4P7001F-1072T.

#### **Applications**

This diode is well suited for use in low loss, low distortion, high power switching circuits and can be used in high magnetic field environments at HF through UHF frequencies. The low thermal resistance of this device provides excellent performance at high RF power incident levels, up to 100 watts CW. This device is designed to meet the most demanding electrical and mechanical MRI environments.

#### **Designed for Automated Assembly**

These SMQ PIN diodes are designed for high volume tape and reel assembly. The rectangular package design provides for highly efficient automatic pick and place assembly techniques. The parallel flat surfaces are suitable for key jaw or vacuum pickup. All solderable surfaces are tin plated and compatible with reflow and vapor phase soldering methods.

## Absolute Maximum Ratings<sup>1</sup> @ 25°C

Parameter	Absolute Maximum
Operating Temperature	-65 °C to +125°C
Storage Temperature	-65 °C to +150°C
Diode Junction Temperature	+175 °C Continuous
Diode Mounting Temperature	+235°C for 10 seconds
RF C.W. Incident Power	+ 50 dBm C.W.
Forward D.C. Current	+ 250 mA
Reverse D.C. Voltage @ -10uA	I - 100 V I

1. Exceeding these limits may cause permanent damage.

Power Dissipation (Maximum)	P <sub>D</sub>	I <sub>F</sub> = +100mA	8W

## Electrical Specifications @ +25 °C

## **Environmental Capability**

MELF devices are appropriate for use in industrial and military applications and can be screened to meet the environmental requirements of MIL-STD-750, MIL-STD-202 as well as other military standards. The table below lists some of the MIL-STD 750 tests the device is designed to meet.

Test	Method	Description
High Temperature Storage	1031	+150°C, for 340 Hours
Temperature Shock	1051	-65°C to +150°C, 20 Cycles
HTRB	1038	80% of rated $V_B$ , +150°C, for 96 Hours
Moisture Resistance	1021	No Initial Conditioning, 85% RH, +85°C
Gross Leak	1071 Cond. E	Dye Penetrant Visual
Vibration Fatigue	2046	20,000G's, 60Hz, x, y, z axis
Solderability	2026	Test Temperature = +245°C
