

# Ultra Low Profile 0805 Balun 50Ω to 50Ω Balanced

### **Description**

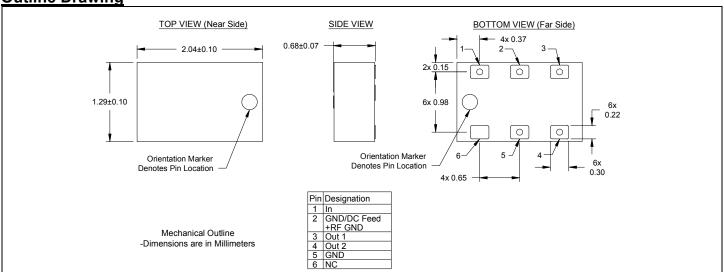

The BD2130J5050AHF is a low profile sub-miniature balanced to unbalanced transformer designed for differential inputs and output locations on next generation wireless chipsets in an easy to use surface mount package covering 802.11b+g+n. The BD2130J5050AHF is ideal for high volume manufacturing and is higher performance than traditional ceramic and lumped element baluns. The BD2130J5050AHF has an unbalanced port impedance of  $50\Omega$  and a  $50\Omega$  balanced port impedance. This transformation enables single ended signals to be applied to differential ports on modern semiconductors. The output ports have equal amplitude (-3dB) with 180 degree phase differential. The BD2130J5050AHF is available on tape and reel for pick and place high volume manufacturing.

**Detailed Electrical Specifications\*:** Specifications subject to change without notice.

Features:	ROOM (25°C)							
<ul> <li>2.1 – 3.0 GHz</li> <li>0.7mm Height Profile</li> <li>50 Ohm to 2 x 25 Ohm</li> <li>802.11 b &amp; g +n Compliant</li> </ul>	Parameter	Min.	Тур.	Max	Min.	Тур.	Max	Unit
	Frequency	2.4		2.5	2.1		3.0	GHz
	Unbalanced Port Imp.		50			50		Ω
Low Insertion Loss	Balanced Port Imp.**		50			50		Ω
DCS, PCS & UMTS	Return Loss	12	17		10	12		dB
• Input to Output DC Isolation	Insertion Loss***		0.75	0.9		1.0	1.2	dB
Surface Mountable     Tage 2 Dead	Amplitude Balance		0.45	0.65		0.7	1.0	dB
<ul><li>Tape &amp; Reel</li><li>Non-conductive Surface</li></ul>	Phase Balance		2	5		2	5	Degrees
RoHS Compliant	Power Handling			2			2	Watts
Halogen Free	Operating Temperature	-55		+85	-55		+85	°C

<sup>\*</sup> Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

## **Mounting Configuration:**

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. An example of a DC-biased footprint is also shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

#### **DC Bias Footprint** No Bias Footprint Dimensions are in Millimeters Circuit Pattern Circuit Pattern Plated thru Dimensions are in Millimeters Mounting Footprint holes to Mounting Footprint Footprint Pad (s) Footprint Pad (s) ground Solder Resist Solder Resist 0402 Capacitor Plated thru holes to ground 6x .41 6x .41 4x .25 3x Transmission 3x Transmission lines 6x .33 6x .33 Plated thru Plated thru holes to holes to ground around

### **Packaging and Ordering Information**

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
