

Xinger®

Ultra Low Profile 0603 RF Jumper

Description

The (patent pending) J0060L5050A00 is an ultra-small low profile jumper that enables the transition of two intersecting RF traces in an easy to use industry standard SMT package. The 0603 jumper permits one path to continue on the PWB while the other path is jumped within the component. The jumper is ideal for any critical applications where layout and available space are a premium and resorting to addition PWB layers and larger overall footprints are unacceptable. With low insertion loss and high isolation packaged with cost in mind, this novel component delivers.

Detailed Electrical Specifications*: Specifications subject to change without notice.

Features:	Parameter	ROOM (25°C)			Unit
		Min.	Typ.	Max	
0 – 6000 MHz. 0.7mm Height Profile 50 Ohm RF Jumper - All Wireless Frequencies - Low Insertion Loss - High Isolation - Surface Mountable - Tape & Reel - Non-conductive Surface - RoHS Compliant	Frequency	0		6000	MHz
	Port Impedance		50		Ω
	Return Loss	16	18		dB
	Insertion Loss		0.1	0.15	dB
	Isolation (cross-talk)				
	0 – 700 MHz	45	53		dB
	700 - 1700 MHz	40	48		dB
	1700 - 2200 MHz	39	46		dB
	2200 - 3000 MHz	37	44		dB
	3000 - 6000 MHz	29	33		dB
	Power Handling			2	Watts
	Operating Temperature	-55		+85	°C

Outline Drawing

Typical Broadband Performance: 500 MHz. to 4500 MHz.

Return Loss

Insertion Loss

Cross Talk S14

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of 17 ppm/°C.

An example of the PCB footprint used in the testing of these parts is shown on below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

Mounting Footprint

Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
