

SMB/SMC COAXIAL CONNECTORS

The Connex SMB/SMC subminiature coaxial connectors with 50 ohm impedance are for applications to 4 GHz (SMB) or 10 GHz (SMC). Generally less expensive than SMA, these connectors are used primarily in applications for microwave telephone and other non-defense telecommunications requirements.

SMB connectors feature quick connect/disconnect snap-on mating and operate to 4 GHz with low reflection.

SMC connectors have #10-32UNF-threaded screw-on couplings and operate reliably to 10 GHz.

Mini 75 ohm connectors are matched-impedance SMB connectors to be used with 75 ohm miniature coax cables. The connectors are the same size as, and intermateable with, standard 50 ohm connectors. Just add -75 to the standard 50 ohm part number to get a 75 ohm connector.

SMB/SMC COAXIAL CONNECTORS

All bodies, unless otherwise noted, are machined brass, gold plated 3μ".

All insulators are teflon.

All center contacts are 30μ" gold plated.

All dimensions in millimeters and [inches].

142XXX designates SMB part numbers.

152XXX designates SMC part numbers.
