Maximus

FXUB66.01.0150C

Specification

Patent Pending

Part No.	**FXUB66.01.0150C**
Product Name	**Maximus** Flexible Ultra Wide-Band Antenna 700-6000MHz
Feature	Patent Pending Ground Plane Independent 700-6000MHz 5 dBi Peak Gain Efficiencies above 60% on all cellular 2G/3G/4G bands 120.4x50.4x0.2 mm size SMA(M) Connector **RoHS Compliant**

1. Introduction

The patent pending Maximus FXUB66 flexible ultra wide band antenna has been designed to cover all working frequencies in the 700-6000 MHz spectrum, including all Cellular, Wi-Fi, ISM and GNSS bands. Its use in a device improves substantially the radiated power and sensitivity, and enables the highest throughput rates of today's broadband devices.

The antenna is delivered with a flexible body with ground breaking high efficiencies on all bands, ground-plane independent, with a cable and connector for easy installation. It is made of durable flexible polymer, with a peak gain of 5dBi, an efficiency of more than 60% across all cellular bands and is designed to be mounted directly onto a plastic or glass enclosure / cover.

At 120.4x50.4x.2mm, the antenna is ultra thin. It is assembled by a simple "peel and stick" process, attaching securely to non-metal surfaces via 3M adhesive.

It enables designers to use only one antenna that covers all frequencies and future proofs device design for LTE and 4G globally. It is also the ideal antenna to fit in devices that are being retrofitted with wireless functionality, as it will cover non cellular applications such as 868, 915MHz or Zigbee applications. It's inherently wide bandwidth is more resistant to detuning than traditional small but narrow-band legacy antennas.

The Maximus antenna has a unique hybrid design. Within one antenna structure the electromagnetic waves travel in two predominant propagation modes - one for lower frequencies, (e.g. LTE at 700 MHz) and the other for higher 4G and Wi-Fi frequencies up to 6GHz.

It is an ideal choice for any device maker that needs to keep manufacturing costs down over the lifetime of a product, as the same antenna can be used if the radio module is upgraded to work on a different frequency band.

Cables and connectors are customizable.

2. Specification

Electrical

Band	700 850 900	1400	1575	1700 1800 1900	2100	2400	2600	3500	5000
Standard	**LTE GSM CDMA**	**MIL**	**GPS**	**LTE GSM CDMA**	**UMTS HSPA**	**ISM WIFI**	**LTE**	**LTE**	**ISM WIFI**
Frequency (MHz)	698-960	1390-1435	1575.42	1710-1990	1755-2170	2400-2500	2500-2700	3400-3600	4800-6000
Polarization	Linear								
Impedance (Ohms)	50 Ohms								
Max VSWR	3.5:1	3.5:1	1.1:1	3.0:1	3.3:1	2.2:1	2.0:1	2.2:1	3.0:1

Radiation Properties	Omni-directional								
Max Input Power (Watts)	5W								

* Antenna measured on 2mm ABS plastic plate.

Mechanical

Dimensions (mm)	120.4x50.4x0.2 mm
Material	Flexible Polymer
Connector and Cable	SMA(M) and 1.37mm mini coax

Environmental

Operation Temp.	-40°C to 85°C
Storage Temp.	-40°C to 85°C
Relative Humidity	40% to 95%
RoHs Compliant	Yes
