

SKY65227-11: WLAN 802.11n Single Band 2.4 GHz MIMO Front-End Module

Description

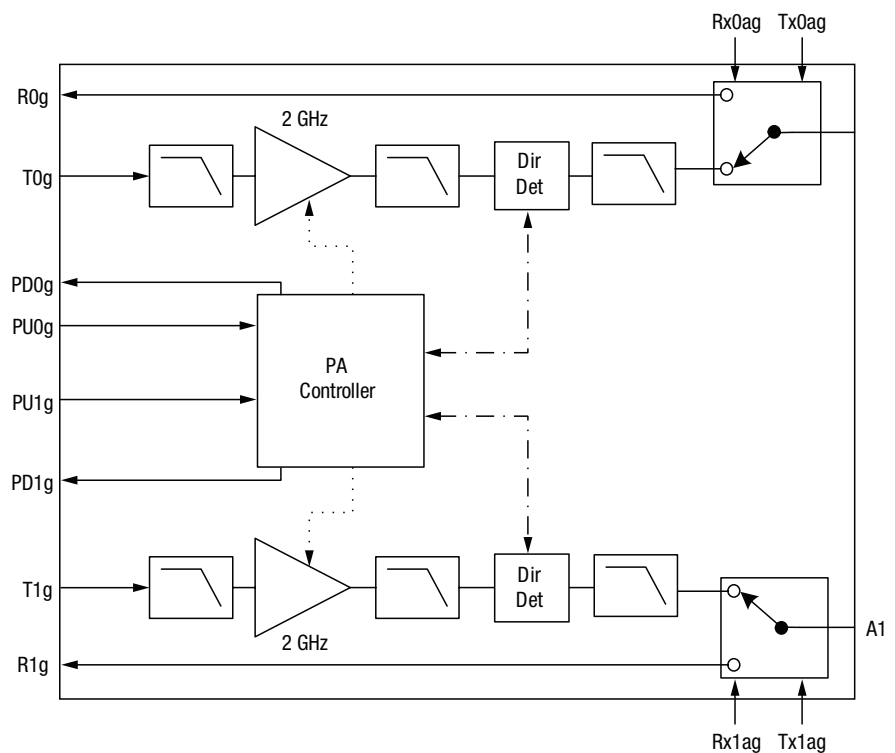

The SKY65227-11 nFEM contains two complete 2.4 GHz transmit/receive chains in one compact RF front-end module optimized for single band 2.4 GHz MIMO (multiple in—multiple out) operation, in compliance with the 802.11n draft standard. The SKY65227-11 includes two 2 GHz PAs with integrated input filtering for 3–4 GHz rejection, and temperature-compensated, directional power detector with 20 dB dynamic range. Also included are low loss, high rejection GaAs harmonic filters and T/R switches which provide high linearity in all transmit paths and low loss in all receive paths.

The SKY65227-11 nFEM achieves outstanding gain matching which is a critical requirement for MIMO operation. This is accomplished through mirrored layout symmetry.

The SKY65227-11 is packaged in a lead (Pb)-free, RoHS-compliant laminate package, which measures 140 mm². This FEM is designed as a pin to pin compatible version of the SKY65225-11 for 2.4 GHz only.
