

Key Features

- 1805 ~ 1880 MHz, 50 Ohm Impedance
- 42.5 dBm P_{sat}
- 45 dB Gain
- 1.27:1 VSWR
- 2.1 dB Noise Figure
- 44% Power Added Efficiency
- Unconditional Stable
- Infinite Load VSWR Protection
- Single DC Power Supply
- · Precision Machined Housing
- RoHS Compliant

Applications

- CDMA
- Mobile Infrastructures
- Fix Wireless Communication

Additional heat sink is required for continuous operation!

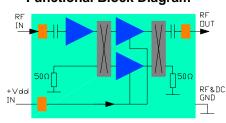

Absolute Maximum Ratings

Application Notes:

A. SMA Torque Wrench Selection

Always use a torque wrench with $5 \sim 6$ inch-lb coupling torque setting for mating the SMA cables to the amplifier. Never use torque more than 8 inch-lb wrench for tightening the mating cable to the connector. Otherwise, the permanent damage will occur to the SMA connectors of the amplifier. 8710-1582 (5 inch-lb) is one of the ideal torque wrench choice from Agilent Technology.

B. Mounting the Amplifier

Use six pieces of #4-40 with longer than 3/8" screws for mounting the amplifier on a metal-based chase. Flat and spring washers are needed to prevent the screw loosening during the shock and vibration. Always use the appropriate torque setting of the power screwdriver to mount them.
